

Eliminates All Paperwork!

CoolCheck-ed is a fully integrated sustainable solution that will simplify and automate your daily, weekly and monthly operational tasks. CoolCheck-ed will give you real time visibility of data and task completion across your entire operations network.

Value Proposition:

- Eliminates paper, printing, ink cartridges, paper distribution and paper storage.
- Record keeping data is automated, secure and time/date stamped.
- Eliminates the risk of falsification of records.
- Identifies and tracks corrective actions.
- Set automated reminders to ensure tasks are completed as planned.

- Automates audit checks.
- Improves visibility and compliance of data history and audit trail.
- Added flexibility and security.
- Automates compliance.
- Increases team's productivity and drives cost savings.

If required, CoolCheck-ed can operate totally independent of your network using 4G technology giving you flexibility, compliance and control even in remote locations.

'Not for storing patient data. just departmental checklists'
