

Alarm Flashers

Radio Transmission

The Alarm Flasher provides a local alarm to enable quick alerting of temperature outages or connectivity problems.

Each Alarm Flasher has an Audible Alarm facility that can be deactivated if not required.

Models

AL1 - Wired Alarm Flasher

The AL1 Alarm Flasher is a wired alarm that plugs into (and is powered from) the Network Controller and so will be located beside the Network Controller.

AL3 – Wireless Alarm Flasher

The AL3 Alarm Flasher is a wireless alarm that communicates via RF signal from the Network Controller and so can be placed anywhere in the system network area.
