- ✓ Easy and intuitive to use for all staff.
- ✓ Ensures compliance with all aspects of food hygiene regulations.
- ✓ Reduces time spent on paperwork and removes the associated risks of human error.
- ✓ Reduce the risks of fines, potential closure and loss of reputation.

The FoodCheck2Go System at Work

Samsung Galaxy Tablet

The user-friendly FoodCheck2Go app is accessed via a Samsung Galaxy Tablet. The tablet comes with a screen protector and hardcase shell. With a touchscreen that's easy to use, minimal training is required.

Samsung Galaxy Tablets provide a reliable and secure platform for working mobility. The robust hardware means that it will endure in the most demanding food business environments.

Thermopen ONE Blue Thermometer

The Thermopen ONE Blue combines the latest Bluetooth wireless technology with high accuracy and precision. The unit includes a dot matrix display which, as well as the temperature, can show a text line with high/low temperature limit to give the user instant, on-screen pass/fail feedback.

The stainless-steel probe conveniently folds back through 180°C into the side of the unit when not in use.

Brother Label Printer

The optional Brother Label Printer makes traceability easier and improves the visibility of product shelf-life information.

The printer operates seamlessly with FoodCheck2Go, duplicating data from the Kelsius tablet such as use-by date, batch code or print date. This ensures clear and accurate labels which can be easily attached to product packaging.

The printer connects easily to the Samsung Galaxy Tablet via a Bluetooth connection.

Reporting Suite

The Reporting Suite helps oversee your food safety performance in every location and make data-driven decisions.

- ✔ Automated task reports and dashboards.
- ✔ Real-time data with date and time stamp and photo option.
- ✔ Non-conformances highlighted, alerts recorded and corrective actions logged.
- ✔ Live and historical data always available.

Security and Compliance

Kelsius engages secure software design practices and has multiple, strict controls in place to protect your data, your privacy and system access.

Kelsius is fully compliant with all industry regulatory requirements.

- ✔ ISO9001:2015 Accredited
- ✔ ISO14001:2015 Accredited
- ✔ ISO 27001 compliance through AWS
- ✔ Compliant with FDA 21 CFR Part 11 regulations

Sustainability

Kelsius is committed to improving global sustainability by focusing on four principles in how we do business, how we manufacture our products, and how we help our customers. Those principles are removing paper, reducing waste, protecting stock and saving energy.
